## HOTSPOT :

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hit Area:

## Answer Area

## Statements

Azure provides flexibility between capital expenditure (CapEx) and operational expenditure (OpEx).

If you create two Azure virtual machines that use the B2S size, each virtual machine will always generate the same monthly costs.

When an Azure virtual machine is stopped, you continue to pay storage costs associated to the virtual machine.

Yes No

 
 
 

## Answer Area

## Statements

Azure provides flexibility between capital expenditure (CapEx) and operational expenditure (OpEx).

Yes No

 

Correct Answer:

If you create two Azure virtual machines that use the B2S size, each virtual machine will always generate the same monthly costs.

 

When an Azure virtual machine is stopped, you continue to pay storage costs associated to the virtual machine.

 

Box 1: Yes -

Traditionally, IT expenses have been considered a Capital Expenditure (CapEx). Today, with the move to the cloud and the pay-as-you-go model, organizations have the ability to stretch their budgets and amortizing their IT CapEx costs to Operating Expenditures (OpEx) instead. This flexibility, in accounting terms, is now most common to the IT as a service model of purchasing software, cloud services and other IT related resources.

Box 2: No -

Two virtual machines using the same size could have different disk configurations. Therefore, the monthly costs could be different.

Box 3: Yes -

When an Azure virtual machine is stopped, you don't pay for the virtual machine. However, you do still pay for the storage costs associated
